

Prepare for the Future with Generative AI Training

Coursera's GenAI Academy can help you gain in-demand AI skills and lead the future of innovation.

For a limited time, the Information & Computing Technology Center of Excellence and Coursera for Campus will offer faculty and staff free access to Generative AI Academy, a collection of over 400 courses from leading industry and university partners covering a wide range of topics in the space of Generative AI, including prompt engineering, ethics, and applied AI for University leaders, among others.

GenAI Academy

Tailored GenAI training for everyone across your organization

- Develop in-demand, durable and transferable AI skills from trusted experts at leading-edge organizations
- Deliver foundational to advanced GenAI learning programs for everyone.
- Personalize learning for individual learner needs with guidance from Coursera Coach.
