INTRODUCTION

Information Technology (IT) is one of today's most in-demand careers, with thousands of jobs being posted every month. Not only can you find IT jobs at the big tech companies, but also at small businesses, healthcare providers, retailers, nonprofits, startups, government agencies, and at companies in every industry. Washington's community and technical colleges can help you get on the path to a rewarding technology career.

You can find IT education programs focused on software development, IT support, network and systems administration, website development and design, cybersecurity, data analytics, coding, video game design, and other emerging technologies.

Community and technical colleges often feature smaller class sizes, lower tuition, hands-on skill building, and instructors who are industry experts. Learn more about Washington's community and technical colleges and find out how to get started at www.sbctc.edu.

This guide outlines the Certificates, Associate of Applied Science degrees, and Bachelor of Applied Science/Bachelor of Science degrees at our colleges. These are often called professional-technical or career training programs, meaning that they help prepare you for jobs.

Click the links throughout this guide to learn more about a program or find out how to get started at a college near you.

The Center of Excellence for Information & Computing Technology provides resources and information for students, job seekers, employers, and others who want to connect to IT opportunities in Washington.

STATEMENT OF CLARIFICATION & ACCURACY

Every effort has been made to provide an accurate and complete listing of information technology programs offered by each college. Despite these efforts to be inclusive and correct, this publication may contain inaccuracies, which should not reflect negatively on the colleges or programs represented. Please report any errors or omissions to info@coeforict.org. We encourage you to visit the college websites directly for the most up-to-date program and degree information.
